County Spelling Match

The Appomattox County Spelling Match will be held Monday, March 23, 1959, at 8:00 P. M., at the Appomattox Elementary School. The match, sponsored by the Lynchburg News and Daily Advance, is part of the elimination for national competition held annually in Washington, D.C. The winner and runner-up from this county will compete in the regional match to be held at Amherst High Schoo, on April 13, 1959.

Pronouncer for the Appomattox Match will be the Rev. William H. Chappell, of Pamplin.

Judges are: the Rev. W. E. Thompson, Jr., of Spout Spring; Mrs. J. R. Meggerson, of Vera, and Mrs. Newton Jennings, of Appomattox.

The winners and runners-up from the county schools who will compete in the County Match are:

Appomattox Elementary

Winner: Carolyn Coleman, age 12, grade 7, daughter of Mr. and Mrs. Twyman Coleman, Appomattox.

Runner-up: Gray Holland, age 12, grade 6, daughter of Mr. and Mrs. Ivey Holland, Appomattox.

Vera

Winner: Virginia Bryant, age 12, grade 6, daughter of Mr. and Mrs. Dan Bryant, Appomattox.

Runner-up: Louise Harris, age 13, grade 7, daughter of Mr. and Mrs. Everett Tibbs, Appomattox.

Appomattox High

Winner: Hazel Almond, age 14, grade 8, daughter of Mr. and Mrs. W. A. Almond, Route 3, Appomattox.

Runner-up: Danny Moon, age 13, grade 8, son of Mr. and Mrs. D. J. Moon, Route 1, Appomattox.

Evergreen

Winner: Kneela Bruce, age 11, grade 6, daughter of Mr. and Mrs. E. T. Bruce, Evergreen.

Runner-up: Juanita Martin, age 12, grade 6, daughter o f Mr . and Mrs. F. H. Martin, Evergreen.

Spout Spring

Winner: Ginger Bean, age 12, grade 7, daughter of Mr. and Mrs. M. S. Bean, Concord.

Runner-up: Brenda Carson, age 12, grade 7, daughter of Mr. and Mrs. C. E. Carson, Spout Spring, Oakville.

Winner: Bunny Moore, age 11, grade 5, daughter of Mr. and Mrs. H. H. Moore, Jr., Appomattox.

Runner-up: Cecil Jamerson, age 11, grade 7, son of Mr. and Mrs. T. M. Jamerson, Gladstone.

Pamplin

Winner: Nancy Tibbs, age 12 grade 6, daughter of Mr. and Mrs. Everett Tibbs, Pamplin.

Runner-up: Sandra Pankey, age 13, grade 7, daughter of Mr. and Mrs. E. L. Pankey, Pamplin.

Science Makes Own Snow to Study Its Mysteries

WASHINGTON—Scientists have created miniature snow storms in their laboratories to unravel the mysteries of one of nature's greatest beauties.

No one has ever found two crystals of snow exactly alike, although thousands have been photographed. The feathery flakes are delicate as the finest lace, and admired by designers of textiles and other objects.

A quarter of a century ago, Dr. Ukichiro Nakaya made the first snow crystals at Hokkaido University, Japan, an island covered in snow, the National Geographic Society says. By 1946 they had succeeded in duplicating it in a cold chamber all the natural types of snow crystals.

After many years of research, Dr. Nakaya has reported that the variety in snow crystals is caused by differences in the temperature and the degree of humidity in the atmosphere. The difference in size and the ease for scientists to estimate upper-air conditions during a snowfall by examining the kinds of snow crystals on the ground.

Snow forms through the condensation of water vapor on tiny particles of matter, such as dust, in the atmosphere. Each particle is only about five hundredths of a hundredth of an inch in diameter—so small that it can be studied only with an electron microscope.

In colder areas, crystals fall as individual units, but in warmer regions, crystals stick together while making their earthward journey. Such a group is called a snowflake, and, in extreme cases, it may grow to be four inches in diameter.

Ocean Floor Holds Many Secrets

WASHINGTON — Scientists hope to pry open Davy Jones's locker to read the private diary of the earth.

Powdered rock, silt, plants shells, bones, and man-made objects sown throughout into the ocean oozytes for billions of years. Layer after layer of sedimentary rock are formed, providing an unsolved chronicle of earthly events.

In places this record runs up both to the time when oceans were first formed.

A new branch of science has developed in recent years to study the history carved in stone at the bottom of the sea, the National Geographic Society says. Known as marine geology, it is so new that until 1946 there was no English-textbook in the field.

A major breakthrough occurred when a Swedish scientist, Dr. B. Kullenberg, invented the piston corer—a device for removing a long column of ocean sediment. So far, scientists have barely scratched the ocean floor, with this promising technique, but they hope drilling will eventually help to answer such questions as "When did life begin?" and "How old is the earth?"

Hospitalized Child Study Is Reported

CHICAGO — The personnel handling of a hospitalized child by doctors and nurses is just as important to his parents as his medical care and treatment, according to researchers.

In a report on the reactions of 100 parents whose children were hospitalized, San Francisco researchers said that hospitalization is as hard on the parents as on the child and that modifications in hospital routine and adequate explanations by the physician can do much to ease the parent's anxiety and their children's.

Of the 100 parents interviewed on the child's admission, all expressed anxiety regarding separation from their child. In 57 their anxiety was "overwhelming" and the parents "had such difficulty coping with their own fears and anxieties that they were unable to give support to their child," the authors said.

However, 44 of 63 parents interviewed on their children's discharge felt better about the hospitalization because of the "strengthening by personal bonding" of their child by the hospital staff.

Tree Farm System Has Grown Rapidly

CHICAGO — More than fifteen years ago the forest industries recognized the tree-growing potential of small woodlots and began doing something about developing them through the American Tree Farm System. Since that time the Tree Farm program has had solid support from the forest industries. Under sponsorship of the American Forest Products Industries it has spread to 45 states. More than 43 million acres of privately owned woodlands have been certified as Tree Farms.
